You must be licensed to download and use Photoshop. You can do so by visiting Adobe.com. Installing Photoshop After you purchase Photoshop, you can download and install it on your computer. Follow these steps: 1. Download the latest release of Photoshop from Adobe's website. You can find the link on the home page. 2. Burn the downloaded folder to a CD or DVD. 3. Mount the DVD in your computer's optical drive. 4. Follow the installation instructions that appear. 5. Launch Photoshop. 6. Complete the optional tutorial that comes with the program if you want to learn how to use Photoshop's tools. You can access the tutorial by selecting Preferences from the Photoshop menu at any time. You can download additional tutorials from Adobe at its online library. 7. Explore Photoshop's features. 8. Decide whether you want to use your computer to work on new images as well as Photoshop. 9. Close Photoshop when you are finished. How to Edit an Image in Photoshop The program has many different tools that enable you to alter an image. For now, focus on the more basic tools — such as Select, Image, Tool, and other windows — and save the more specialized tools for future reference. In Photoshop, you use the following tools to create, edit, and modify an image: Select: The most powerful tool is the Select tool. From here you can select a specific portion of the image, or you can select all the items in the image. You can select an object, such as a word, a tree, or the window in the figure on the left, or select an entire image. The white arrows in the figure indicate the active selection. Figure 1-1: Use the Select tool to add or delete objects. You can use the Select tool in five ways: Move: Use the arrow keys to add or delete an object or to move an object. Use the scroll bars on the screen to zoom in and out. Select: Click with the mouse pointer to select an object or an entire image. You can then click again to select multiple objects or move them elsewhere. Delete: Click to delete an object, or use the Delete key to delete an object. Crop: Open the Crop tool and click to add or subtract an image portion from the background. You

Q: MySQL: Inserting records when an existing one is mis-matched I'm new to mySQL, I've got 2 tables, one with marketing descriptions, they are a-z, one with requirements, they are alpha only I'm trying to pick out the marketing descriptions that are missing elements from the requirements, the output i'm looking for is the marketing codes and the ID of the requirement they're missing from I can find missing elements in the requirements fairly well but can't work out a query to insert all of the missing elements into a second table with that matching ID and with a column in the second table that describes the missing element CREATE TABLE `marketing_codes` (`marketing_id` int(6) NOT NULL, `marketing_name` varchar(25) NOT NULL, PRIMARY KEY (`marketing_id`,`marketing_name`)) ENGINE=InnoDB DEFAULT CHARSET=latin1; CREATE TABLE `requirements` (`requirement_id` int(6) NOT NULL, `requirement` varchar(6) NOT NULL, PRIMARY KEY (`requirement_id`,`requirement`)) ENGINE=InnoDB DEFAULT CHARSET=latin1; INSERT INTO marketing_codes(marketing_id,marketing_name) SELECT marketing_id, marketing_name FROM marketing WHERE marketing_name LIKE '%Customer Service%' OR marketing_name LIKE '%Legal%' OR marketing_name LIKE '%accounts%' UNION ALL SELECT requirement_id, requirement FROM requirements

What's New in the Adobe Photoshop CC?

Douglas William Scott (inset) and Stacey Morrison (left) – both of whom had no prior criminal records – were sentenced in a joint plea bargain to one year in the county jail with credit for time served. Last week in San Bernardino, District Attorney Mike Ramos announced the arrest of a group of four girls who stole from the people they allegedly call family. In September 2010, Paula Roberts, her husband, Michael, and their three daughters, along with husband Robert Williams and two of his sons, were asleep at their home in Montclair in San Bernardino County. At approximately 4 a.m., the five were awakened by Roberts' teenage daughter – who called 911 – because they didn't remember how to enter their garage in the dark. Roberts and her family were sleeping in the living room while the children were sleeping in the garage, according to investigators. A man who had recently bought the Roberts' house drove by and found the scene. He called 911 and walked down the driveway and through the gate to the Roberts' home. A San Bernardino County Sheriffs Department (SBSD) sergeant and two Montclair police officers also arrived and proceeded to get everyone into the house so they wouldn't fall outside. The situation was unsettling for the children, who had never been in their own garage before. After everyone was situated, the officers and deputies began to look for signs of forced entry. They found the garage door was open and something was missing. The Roberts' investigated and found the property the family were missing was safe and accounted for. The stolen items were the Roberts' mobile phone, television, camcorder and other items that had been left out for repair or housing in the garage. A short time later, the SBSD sergeant and two officers were sent to the house on the 1300 block of Boggs Street in Montclair, where the officers said they found stolen property from the Roberts' garage. Those items included the Roberts' camcorder, camera, lawn chairs, four-wheeler, computer and other items. SBSD Lieutenant Robert Murtha told The San Bernardino Sun the items were never recovered. "The victims did not want to press charges, and they were not interested in a civil action," said Ramos. Five children were home at the time of the burglary. They were about ages 9 and 10
