In the near future, America is under threat from a terrorist organization, who are planning on destroying the USA by sending a prototype infection into the major cities of the USA. Only you, the player, can stop them. In order to do this, you need to be able to survive as long as it takes to neutralize the virus. You have to complete a series of carefully timed challenges in order to accomplish this. The challenges range from increasing your strength, to completing missions, to surviving against a series of deadly enemies. You also have to work with an AI security guard, named Jack, to accomplish the mission. You have to carefully time your actions to avoid conflict and, if there is any conflict, you must resolve it. While this does not mean that your work is over, you also need to find a way to escape the zone you are in. If you fail, your chances of survival are greatly reduced, and the virus will go free. Each city is loaded with beautifully designed locales that have been redone in stunning 1080p. Every major city has a distinct personality, which is reflected in the architecture, colors, and people.
